Dear Dannie:

Thanks for the phone consultation today. I enclose copies of two letters from Jerry Novotny: one dated 12/20/91, containing the quotes which we used for calculating our budget and drafting the Pocahontas County 911 ordinance and which has been discussed with Alltel on numerous occasions; one dated 5/18/93, containing a revised set of quotes, (By the way, we did ask for the quote on the CENTREX features, but definitely did not request any new quotes on the trunks!)

Like you, I hope and trust this situation can be resolved amicably. We don't want special treatment, but we are a small, poor county attempting to start up 911 service on a very limited income base. We undertook this effort, and it was approved by our County Commission, in reliance on the quotes we received from Alltel. Any significant change in the quoted rates during the critical first couple of years of startup could have a serious negative impact on our ability to deliver a quality service to the public.

Sincerely,

Gibbs Kinderman

Call to Gibbs on 25 JUN 93: Out: MSTC has agreed to apply the originally-quoted rates for one year.

Dear Dannie:

Sorry to be so late in responding - thanks for coming to our meeting, and thanks for the mailing. As you suggested, I enclose the information ALLTEL sent us regarding 911 charges for your review and comment.

By the way, the Supreme Court Jail Monitor is evidently about to insist that Pocahontas County have two people in the jail at all times, which will necessitate more staffing - and be an added impetus to the Commissioners to implement 911.

Thanks again for your help,

Gibbs Kinderman

ALI RECORDS:

For Alltel Customer Address Information, for enhanced operations, the following rates apply:

Automatic Location Identification, per 1,000 data entries:

Service Connection Charge	\$ 1,000.00
Monthly Rate	\$ 50.00

The data entry count is rounded upward to the nearest 1000. This count is based upon the maximum number of a combination of customer accounts and access lines in the E-911 serving area during the most current twelve-month period at the time service is established. This count is determined by the Telephone Company and will be adjusted annually, in a like manner thereafter, for the purposes of updating customer billing. Where the count of data entries has been adjusted upward, the Initial Non-Recurring Charge applies for each 1000 data entries so adjusted (after rounding).

Based on the total line count of 4,289 supplied in my earlier letter, applying the above costs would be:

<u>ITEM</u>	<u>QUANTITY</u>	<u>INSTALLATION</u>	<u>MONTHLY</u>
Service connection charge			
4,289 records rounded to 5,000	5	\$ 5,000.00	
Data update	5		\$ 250.00
